GREEN FLUO ISSUE • n°39 • 2024

Cantieri Pisa presents Polaris 48, the first model in a range of steel and aluminium voyagers characterised by their great versatility. Antonio Luxardo, the yard's chief designer, created the exterior lines for the entire range, while Optima Design will handle the engineering.

The exteriors feature convivial, multifunctional water's edge terraces, plenty of room for various amenities to explore otherwise inaccessible bays and storage space for long cruises. The interior design of this first unit – 48 metres in length and with

a beam of nearly 9 metres – is by Parisotto + Formenton studio. Two cabins – a master suite and a VIP stateroom – are on the 48's Main Deck, which boasts around 200 square metres of convivial living space, including a 50 m² interior and 150 m² outdoor lounge, with a relaxation area that can also host a Jacuzzi. The gunwale opens out to make it easier to haul up the tender, as well as creating even more space for guests when the tender is in the water. As a result can therefore be used as a beach area, a covered terrace or a relaxation space. cantieridipisa.com
